

Three Unimas graduates receive STA awards

KUCHING: Three outstanding graduates of Universiti Malaysia Sarawak's Resource Science and Technology Faculty were yesterday recipients of awards from Sarawak Timber Association (STA).

The awards encourage graduates to continue their hard work and dedication to their careers.

Chai Kwan Lin, a Kuching boy, received the Best Graduating Student 2007.

Throughout his undergraduate years, Chai was consistently in the Dean's List.

Farawahida Abu Zahrin and Kho Swee Ling, meanwhile, shared the Best Final Year Project Paper 2007

award.

Farawahida's paper was on 'Physical and Mechanical Properties of Acacia Hybrid and Superbulk Planted in Sarawak'.

She hails from Kuala Pilah, Negeri Sembilan.

Kho's paper had an equally 'brainy' sounding title - 'Vegetative Propagation of Isau (Dimorcarpus longan var malesianus) by Convectional Method and In Vitro Technique'.

All three received certificates, plaques and cash between RM250 and RM1,000.

The ceremony took place at Unimas' gleaming Kota Samarahan campus.
